Indicators Used

INDICATOR	DESCRIPTION AND HOW IT WAS CALCULATED
Retention Rate	The Retention Rate is calculated by taking the number of those same students who returned in the current academic year and dividing it by the population of first-time program students in the previous academic year. (# of same who returned in the current year / # program starts in the previous academic year)
Graduation Rate	The Graduation Rate is calculated by taking the number of those same students who graduated from the intended degree program in the current academic year and dividing it by the population of first-time program students six years ago for the undergraduate program and five years ago for the graduate program. (# of same who graduated in the current year / # program starts five or six years ago)
